YSU Computer Domain and Name Lookup Guide
Windows 7 Professional/Ultimate and Windows Vista Professional/Ultimate

Required Items:
- YSU-owned computer
- Windows 7 or Windows Vista operating system

Step 1: Find the Start Button in Windows located in the bottom left corner of your screen and left-click on it.

Step 2: Locate the “Computer” option in the start menu and right-click on it.
Step 3: Locate the “Properties” option and left-click on it.

Step 4: Locate the computer name, and domain under the System heading. The domain should be **ysu.local** if the computer has been correctly added to the YSU domain.
