YSU Computer Domain and Name Lookup Guide
Windows XP Professional Service Pack 3

Required Items:
- YSU-owned computer
- Windows XP operating system with Service Pack 3 installed

**Step 1:** Locate the Start Menu icon in Windows in the bottom left corner of the screen

**Step 2:** Locate the My Computer option and right-click on it
Step 3: Locate the properties option and left-click it

Step 4: Locate the Computer Name tab and left-click on it
Step 5: Locate the Full computer name and Domain fields. This is the computer’s name on the domain and the domain it is on. The domain should be \texttt{ysu.local} if it is configured correctly.
