YSU Secure Wireless Connection Guide
Windows 10

Required Items:
- Windows 10
- Any 802.11 a/g/n wireless radio supporting the WPA2 Enterprise authentication method and the AES encryption type
- A current supported anti-virus product
- Your YSU Directory Account (MyYSU) username and password

Step 1: Walk within range of the YSU Secure Wireless System.
*Range is anywhere within approximately 100 feet of a wireless-enabled building. Range will vary with radio.

Step 2: From the Desktop, Click on the Wi-Fi icon.

Step 3: Choose ‘ysuwireless’.
Step 4: Enter your MyYSU username and password in the designated fields and then click “OK.”

Step 5: When prompted click “Connect.”
Troubleshooting Tips:
If unable to connect to *ysuwireless*, remove the *ysuwireless* profile and reconfigure it.

Step 1: Click on the ‘Network Settings’ option.

Step 6: Click on the WiFi icon and verify that ‘ysuwireless’ is Connected.
Step 2: Click on the ‘Manage Wi-Fi settings’ option.

Step 3: Choose ‘ysuwireless’ and then click the ‘Forget’ button to remove the ysuwireless profile.

Step 4: Refer to Page #1, Step #1, and attempt to connect to ysuwireless.
