YSU Secure Wireless Connection Guide

Apple iOS Devices (Apple iPhone / iPod Touch / iPad / iPad Mini)

**Required Items:** iPhone, iPod Touch or iPad with iOS 2.0 or later

This guide will assist you with configuring your iPhone, iPod Touch or iPad (*iOS 2.0 or later*) for connection to the ‘ysuwireless’ network. The setup instructions will be set up in steps. Please be sure to complete all of the setting changes in each step before moving on to the next.

**Step 1:** Tap on **Settings** from your iOS device’s Home screen

**Step 2:** Tap **Wi-Fi**
Step 3: Tap ysuwireless

*Note:* If your device is already connected to attwifi, make sure to tap on the arrow next to the network to forget the network and disconnect from it before continuing.

Step 4: Enter your YSU Directory Account Username and Password (MyYSU Login ID & Password)

Tap Join

*Note:* Your iOS device may take up to 10 seconds to connect to the network. Once your device has successfully connected to ysuwireless, a ‘WiFi connected’ signal strength indicator will appear and ysuwireless will have a check mark next to it in the list.
