Course/Day/Time_____ Instructor's Name_____

Semester_____

## STATEMENT OF SAFETY EXPECTATIONS

Safety is of utmost importance in the laboratories in the STEM College at Youngstown State University. The first offense for a safety violation in the STEM College is a grade of zero for that laboratory session. The second offense will result in a grade of F in the laboratory course. You are expected to wear your goggles and lab coat, and dress appropriately (Long pants and closed toes shoes) for the entire lab session. Food and beverages are not permitted in the lab. Cell phones and other electronic devices should not be used during the lab session. Additional rules apply depending on the specific lab hazards. Your instructor will discuss each of these at the start of the semester and during each lab session.

Additionally, cell phone usage is prohibited in lab as they become a distraction and can become contaminated with chemical compounds. Students also will not be admitted five minutes after the lab begins. Tardiness will not be tolerated for the laboratory.

There are no exceptions to this rule.

*By signing this document, you, the student, acknowledges that you understand the safety expectations of the YSU STEM College.*
